Thanks Peter, looks like Monday at 4:00 in our Denver will work good. Our office is located at:

AMEC
Colorado Center
Tower 2, 2000 S Colorado Blvd, 10th Floor
Denver, CO
80222

303 935 6505

In the map below the location pin is Tower 1 on the property, the AMEC offices are in Tower 2, right at the intersection of Colorado Blvd and Colorado Center Drive, just south of Dave and Buster's on the map.

Ron Borrego, P.E.

AMEC Environment & Infrastructure

1239 Main Avenue

Subject: RE: ARSG Brainstorming Session

It's the South Jamaica office. I will be sending out better instructions on location along with some background info about upper Cement Creek probably later today to all the participants.

Peter,

Can you confirm which office of CH2M Hill office we are meeting at. On their website they have offices in Englewood (9191 South Jamaica Street) and Greenwood Village (6399 S. Fiddlers Green Circle) both in Southeast Denver.

Ron

Subject: ARSG Brainstorming Session

Greetings All –

Thank you for agreeing to attend the brainstorming session organized by the Animas River Stakeholders Group. Attached is the probable list of attendees although there are a few “maybes” in that list. CH2M Hill has graciously offered to host the session at their offices in the southeast Denver area. While we will forward some more explicit directions to their offices later, their offices are at point A on the attached map. The session will be held from 2:00 – 5:30 on Tuesday, April 1st. We hope you will join us for dinner afterwards (on us) at the Brio Tuscan Grille, point B on the attached map.

We plan to brainstorm on innovative ways to treat or otherwise reduce acid mine drainage, using the situation in the Cement Creek drainage near Silverton as a case study area. We will forward more details about the area and the four main adits of concern (cumulatively 600+ gpm) in a future email. We are purposely going to avoid discussion of issues such as funding, permitting, liability, land ownership, and other political issues so that we can focus creatively on techniques and technologies for managing and/or treating the AMD. Again, as I mentioned in your

invitations, we hope you will look at this as an opportunity to explore some creative ideas with a number of colleagues that you may have had over the years but haven't necessarily implemented.

Note: On the attached list of names, about the first half are people that we know have some experience or knowledge about Cement Creek. I tried to list the people with the most knowledge about Cement Creek towards the top of the list.

Thanks again for your willingness to participate. We will be in touch.

Peter Butler, Ph.D.
